

Decoding Perceptions of the Everyday

Dr. Sigmoid Fraud, S.M.F., G.E.D., D.V.M., A.A.S.

1. Introduction

It is well established by my previous research the strong symbolism encountered in subject dreams, which can be used to interpret psychological state. What is less well established is the counter symbolism encountered during conscious state. My research reveals that interpretation of everyday occurrences is a strong indicator of psychological states. By analyzing word choices used to describe mainstream activities, we can draw accurate conclusions about thoughts and attitudes.

2. Methodology

During the experiments described below, test subjects were exposed to controlled stimuli and observed for common descriptions. Correlations between descriptions and attitudes are studies, and pairs with a p-value greater than 0.5 are accepted. Below are stimulation descriptions studied.

2.1 Facial Features

1. Eyes

2. Nose
3. Cheeks
4. Lips
5. Chin
6. Ears
7. Hair
8. Eyebrows
9. Mustache
10. Goatee

2.2 Units of Time

1. Second
2. Minute
3. Hour
4. Day
5. Week
6. Month
7. Year
8. Decade
9. Century
10. Millennium

2.3 Utensils

1. Fork
2. Knife
3. Spoon
4. Ladle
5. Grater
6. Can Opener
7. Cheese Slicer
8. Colander
